Mohammad Arib Salim

B.Tech CSE @ IMSEC | Machine Learning | Building Predictive Models & Statistical Pipelines
Amroha, Uttar Pradesh, India

Summary

I am a B.Tech Computer Science and Engineering student at IMS Engineering College, Ghaziabad. My journey into machine learning wasn't driven by placement pressure; it started with a genuine fascination for how systems can learn from their own mistakes and optimize across millions of iterations. I care about understanding the math beneath the abstraction. Whether I am deep in textbooks like Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow, or engineering new datasets, my goal is always to understand the "why" behind the algorithms, rather than just making them run. What I build: 1. Custom Statistical Modeling: Engineered a Premier League match predictor utilizing 70+ leakage-free pre-match features, evolving from basic Decision Trees to a hybrid XGBoost model and a Dixon-Coles statistical goal model implemented from scratch. 2. End-to-End Pipelines: Built StudyScore, a Flask-deployed ML web app. To overcome the limitations of standard Linear Regression, I engineered custom mathematical interaction terms to successfully capture non-linear variables. 3. Data Architecture: Developed an Ames Housing price predictor, establishing a rigorous workflow for treating messy, high-dimensional data (80 features), utilizing advanced categorical encoding and cross-validation. Algorithmic Foundation: A strong ML engineer needs strong computer science fundamentals. To ensure my code is optimally structured, I solve DSA problems daily across LeetCode, GeeksforGeeks (currently at 190+ problems), and Codeforces. Core Stack: Python | Scikit-Learn | ML Models | Pandas | NumPy | SciPy | Flask | C++

Experience

FlyRank AI

Machine Learning Internship

June 2026 - Present (2 months)

Amroha

Machine Learning track intern in the July 2026 cohort. Working through foundation AI fluency assignments and ML specific track work, with a reproducible notebook or script as the capstone deliverable.

Education

St Mary's Convent Sr. Sec. School

· (2011 - 2025)

IMS Engineering College

Bachelor's Degree , Computer Science · (August 2025)
