- › Slide 3 — Introduction (Meet the Team)
- › Slide 11 — Conclusion
- › Slide 12 — Urge Investors

01 SLIDE 1 — Opening (Logo + Welcome as Presentation Leader)

PRESENTER TIP: Walk up confidently. Pause for a moment before speaking — let the slide sink in. Make eye contact with the audience or judges.

Good [morning/afternoon/evening], everyone.

My name is Arib, Co-Founder and CTO of EngiNova Technologies — and on behalf of my entire team, welcome to our pitch.

What you're looking at right now is more than just a logo. It represents a vision — a vision to fundamentally change how engineers work, design, and build in the modern world.

Today, the five of us are here to take you through that vision — from the problem we're solving, to the market we're targeting, to the business we're building.

I'll start things off, and then hand over to my teammates as we move through each section.

So — let's get into it.

02 SLIDE 2 — Punch Line

PRESENTER TIP: *Deliver this line slowly and with conviction. This is your hook — the one line that should stick in the audience's mind.*

"Engineering Innovation Through Software."

That's our promise — four words that capture everything we stand for.

Engineering has always been the backbone of human progress. But for decades, the tools engineers rely on have been clunky and expensive. Legacy software companies like Autodesk have dominated the market — and engineers have had no choice but to pay the price.

EngiNova Technologies is here to change that.

We believe that engineering innovation shouldn't be gated by the size of your budget or the IT support you can afford. With the power of AI and the cloud, we're bringing world-class engineering tools to every engineer — whether you're a startup of 3 or a manufacturing firm of 3,000.

This is EngiNova. This is our mission. And this is why we built it.

03 SLIDE 3 — Introduction (Meet the Team)

PRESENTER TIP: *Point to each team member (or their name on the slide) as you introduce them. Keep it warm and personal — let the judges feel the team's chemistry.*

Now, before we dive into the details of our product and market — let me introduce the team that's making all of this possible.

EngiNova Technologies was founded by five passionate engineers and business minds, all united by a shared frustration with the status quo — and the drive to do something about it.

I'm Arib — Co-Founder and CTO.

Parul Verma is our CEO

Parth is our COO.

Uday is our Lead Engineer

And Pranjal is our Head of Marketing.

We are not trying to just build a product, we are trying to build a company.

And with that, let me hand it over to Parth, who will walk you through our purpose and objectives.

11 SLIDE 11 — Conclusion (Roadmap & Key Takeaways)

PRESENTER TIP: *This is where you tie everything together. Speak slowly and deliberately. You're bringing the audience to the final ask — make them feel the momentum.*

Thank you to my teammates for walking you through the details of what we've built. Now let me bring it all together.

Let me summarize the four key takeaways from everything you've seen today:

First — the market opportunity is massive. We're looking at a \$53 billion industry today, growing at an 18.45% rate. This is not a niche market. This is a generational opportunity.

Second — our solution is genuinely innovative. EngiNova is a platform that disrupts legacy players. We're not iterating on old software — we're rebuilding engineering tools from the ground up for the modern era.

Third — we have the right team. Five co-founders with hands-on expertise across engineering, AI, and business. We are not just dreamers — we are builders.

And fourth — We have a clear path for making profits — break-even by Year 3, with \$4 million in annual revenue.

We also have a very phased and layered roadmap as you can interpret.

As a team, we made a commitment — and I want to read it to you:

"We are committed to transforming the engineering software industry by making advanced tools accessible, affordable, and intelligent. Our mission is to empower every engineer to innovate without boundaries."

That is the EngiNova's promise.

And now — I want to tell you how you can be part of it.

12 SLIDE 12 — Urge Investors (The Ask)

PRESENTER TIP: *This is your closing — make it count. Speak directly to investors/judges. Lean forward slightly. End with confident eye contact and let the silence land after your final line.*

We are raising a \$750,000 seed round — in exchange for 15% equity.

This is not just capital. This is a partnership to capture a share of a \$246 billion market opportunity that is growing faster than ever.

Here's exactly how we will deploy this investment:

40% — into product development and R&D.

30% — into sales and marketing.

20% — into team expansion.

And 10% — into operations and infrastructure.

We have the market. We have the product. We have the team. And we have a clear plan.

All we need now — is the right partners to help us get there.

If you believe — as we do — that every engineer in the world deserves access to world-class tools... then we invite you to join us in building that future.

Thank you.
